

Era Clear Span Ceiling Panels

meet the toughest structural
codes without the hassle and
expense of posts and beams!

Kolpak evaluated the ground snow, panel layout, adjacent building, and snow drift to determine the most economical ceiling type for every outdoor walk-in. The Era Clear Span Ceiling has a much higher load capacity, in addition to longer spans without requiring interior steel, post and beam support*:

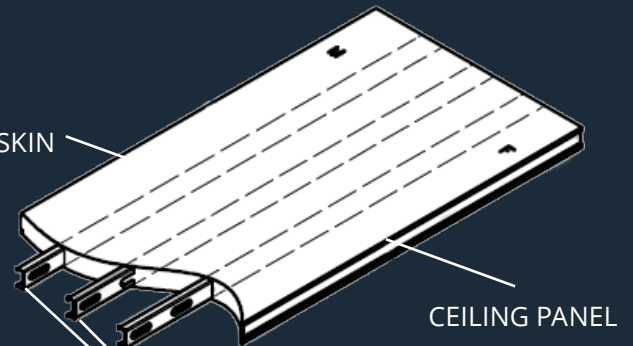

Era Clear Span outdoor ceiling offers

- ▶ *approximately twice the allowable span vs. standard ceiling*
- ▶ *approximately a 40% increase in allowable span vs. super ceiling*
- ▶ *single spans up to 20'*
- ▶ *4" and 6" options*

Reduced
requirement for
interior steel

Longest
self-supporting
span in the
industry

20 Ga. EXTERIOR METAL SKIN

CEILING PANEL

12 Ga. METAL STUD
FOAMED IN PLACE
(3 PER 46" PANEL)

* subject to engineering review (some projects still may require steel)
